

ARYA SINHA

• Software Developer •

EDUCATION

- Bangalore Institute of Technology
Bachelor of Engineering (Computer Science - 8.4 CGPA) - 2020
- Mount Carmel School (ICSE) : 10th - 91.3% | 12th - 87.0%

CERTIFICATES

- AI Foundation Certification - Oracle
- Oracle Cloud Infrastructure Foundations

EXPERIENCE

ORACLE (September, 2020 - Present)

Cloud Consultant (September, 2024 - Present)

- Led the end-to-end design and delivery of an AI-powered internal code repository cutting redundant code instances by 35% across 6+ teams with advanced search, automated backups, and smart component matching and automated query optimization via RESTful APIs and Java backend services.
- Owned design-through-deployment of a configuration-comparison service that queries multiple cloud environments in parallel via REST, normalizes JSON/XML metadata into a structured relational model, and auto-detects mismatches — cutting cross-environment payroll-configuration sign-off time by 80% and removing a manual review step for 3 release cycles/quarter.
- Designed a single-click configuration-workbook generation service that maps live configuration data into standardized templates and auto-delivers via SMTP - saving 300+ hours per client rollout across 5+ customer rollouts, and drove its adoption as the team's standard tool for configuration handoff.

Senior Analyst (March, 2022 - August, 2024)

- Led design and delivery of a full-scale payroll reconciliation platform, replacing manual spreadsheet cross-checks with interactive drill-down dashboards; reduced payroll validation time by 30% and reduced downstream payroll-correction incidents traced to reconciliation errors.
- Architected an end-to-end performance-evaluation portal (dynamic dashboards, automated reminder engine, rating workflows) used by 500+ employees across multiple business units, increased on-time evaluation submissions by 40% and cut cycle time by 25%.

Analyst (September, 2020 - February, 2022)

- Accelerated legacy-to-cloud HCM migrations by contributing to an enterprise data migration framework that validated and transformed large volumes of legacy data for cloud migration, enabling faster conversions across multiple modules and reducing post-migration data-error rework
- Built and maintained a reliable reporting layer for business stakeholders by writing complex SQL and PL/SQL queries, designing structured RTF report templates, and automating recurring data extracts — ensuring consistent, accurate access to operational data.

Technologies Used : Java, SpringBoot, JavaScript, RESTful APIs, Oracle Database, SQL/PLSQL, Oracle APEX

PRACTO (January, 2020 - June, 2020)

SDET Intern

- Improved testing accuracy and reduced bug-resolution time by developing and executing comprehensive automation test suites and managing the defect-logging and resolution workflow

Technologies Used : Python, SQL, GIT, Jira

IBM (January, 2019 - March, 2019)

SDE Intern

- Reduced manual resume screening time and enhanced candidate selection accuracy, measured by faster screening throughput and improved match quality during hiring, by designing and implementing an automated resume screening system that leveraged IBM Watson NLP services, Java, and JSON for intelligent parsing and ranking of candidate profiles.

Technologies Used : Java, JSON, NLP(Natural Language Processing), IBM Watson

SKILLS

Java, SpringBoot, JavaScript, Oracle Database, SQL/PLSQL,
Oracle APEX, RESTful APIs, GIT, Docker
Presentation Skills, Team Work, Leadership Skills
